SORROW

**The Band.** It was more than 5 years ago when these guys decided to take up arms and create a new and incredible musical entity based on speed, technical skills and the faible for the ironic side of insanity: Seeds of Sorrow was born. Aiming to record and release their first material as soon as possible, the band went straight into the studio to rehearse for their first album "Final Blast". The energy, the row power and the purity contained in this album were the keyfacts that convinced Demonwware Records to sign Seeds of Sorrow on their rooster.

**The Past.** What followed were years of hard work, a fast growing fanbase in Austria, Germany, the Czech Republic and Slovakia and exploding onstage performances - more than 100 concerts with the likes of Vader, Obituary, Cannibal Corpse, Sinister, Infernal Majesty, Dark Funeral and Krabathor, with great old school metal bands like Manowar, Overkill, Saxon, Sodom, and some stunning acts at huge festivals throughout Europe- Donauinselfest in Vienna (the biggest music festival in Europe), Freeparty Vienna (audience: more than 150.000 people!), Nuclear Storm Festival (Czech Republic), Rock in Allhau (A), etc.

**The Album.** The beginning of 1999 marked the release of their last and obviously most powerful opus: "Bleeding Eyes" offers 9 tracks which cover a really wide spectrum of different sounds and atmospheres combined to great musical arrangements. This album best deserves the "state of the art" attribute if you think of this unique mixture of extremely heavy parts and melodic moments. You will surely be possessed by the demonic groove that emanates from songs like "Kinderf\*cker" (the unofficial Seeds of Sorrow anthem!), "Under my skin" and of course "Bleeding Eyes".
